Australian Owned and Operated

Reliable, convenient and simple ATMs

Insightcash Pty Ltd, trading as InCash ATMs, is a wholly owned Australian company providing cash solutions across Australia.

Our quality service, reliability and consistency have enabled us to establish strong long-term partnerships with both our clients and suppliers, so our network is rapidly expanding.

Products

Our key focus is ensuring that you benefit from our range of products. With that in mind, we only engage the most reliable and efficient products to help ease the inner workings and operations of your business.

Support

You can also be confident that our in-house support staff can assist should any issue arise. If necessary, we will dispatch one of our qualified field technicians who are situated in some of the most challenging locations in Australia.

Footprint

A cornerstone of our business is the strong partnerships that truly enable us to effectively service a national footprint, no matter how far and wide our customers are spread.

Prior to establishing InCash ATMs, I grew up on the Atherton Tablelands in Far North Queensland and went on to play 15 years of rugby league at the highest level.

These formative experiences not only taught me the value of a solid work ethic, but honed my moral compass which in turn drove me to create the service-driven culture that is the fundamental platform of InCash ATMs today.

*Furthermore, having played in four straight State of Origin series wins for Queensland, and appeared in four successive NRL Grand Finals for Melbourne Storm, I have a solid understanding of the principles of **resilience, professionalism and success**. I now ensure that these principles are very much evident in our business, through our constant dedication to our customers' needs, and ongoing analysis to ensure that our customer experience is seamless.*

*InCash ATMs Founder and Managing Director

Nautalis Hyosung NH2700

Our preferred machine of choice is the Nautalis Hyosung Monimax NH2700, which is specifically designed to provide reliable and effective 24-hour cash dispensing solution. It is one of the smartest machines and most compact footprints on the market, so we are confident the Monimax NH2700 will exceed your expectations. With multiple functions, including onscreen advertising, dynamic currency conversion, flexible/adjustable surcharge limits and reporting, this machine will support all functions required to create a simple and enjoyable experience for your customers.

Reliability

State of the art technology acquired through our experience in the US retail industry ensures speedy and accurate transactions. Features such as UL29 I business hour safe. VISA/PCI EPP certified and verified software make the Hyosung's NH series a leader in ATM security.

Scalability

Equipped with a wide variety of cash dispensing units, the Hyosung's NH series not only can fill up to 6,000 notes but also gives a choice of price range for the customers. In addition, the display and safe specification can be customised as an option.

Flexibility

Ergonomic design allows the Hyosung's NH series to be installed virtually anywhere and the function keys with 7" wide display and voice guidance system complies with ADA regulations.

Unit arrangement, voice guidance system, and transaction guidance indicator offers comfortable accessibility to all customers. Furthermore highly visible topper makes it easy for customers to spot the ATM.

Communication Options

With InCash you can choose from dial up, leased line or wireless connections. A member of our sales team can assist you with determining the best option for your business.

Services

Should you need support, our experienced technical support staff are here to assist. 99% of faults can be fixed over the phone, although should the problem require further consultation, we can dispatch one of our experienced field technicians. We guarantee a same day response to have you back up and running with the minimum amount of inconvenience.

As part of our commitment to the smooth running of your business, we also take preventative measures to identify problems before they occur. With 24/7 remote monitoring of our network, we will often be aware of an issue before our customers, and depending on the error, we can proactively contact you to work through it or dispatch a technician to get you back online.
